**USA
EDITION**

Important Safeguards

When using electrical appliances, basic safety precautions should always be followed including the following:

1. Read all instructions.
2. Plug into a grounded outlet, do not remove grounding prong, do not use an adapter, and do not use an extension cord.
3. Replace all panels before operating.
4. It is recommended that a separate circuit serving only your appliance be provided. Use receptacles that cannot be turned off by a switch or pull chain.
5. Never clean appliance parts with flammable fluids. These fumes can create a fire hazard or explosion. And do not store or use gasoline or other flammable vapours and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.
6. Do not connect or disconnect the electric plug when your hands are wet.
7. Unplug the appliance or disconnect power before cleaning or servicing. Failure to do so can result in electrical shock or death.
8. Do not attempt to repair or replace any part of your appliance unless it is specifically recommended in this manual. All other services should be referred to a qualified technician.
9. Use two or more people to move and install this appliance. Failure to do so can result in back or other injury.
10. To ensure proper ventilation of this appliance, the front of the unit must be completely unobstructed.
11. Choose a well-ventilated area with temperatures above 50°F (10°C) and below 109.4°F (43°C).
12. The appliance should not be located next to ovens, grills or other sources of high heat.
13. It is important that the appliance be leveled in order to work properly. You may need to make several adjustments to level it.
14. All installations must be in accordance with local plumbing code requirements. Make certain that the pipes are not pinched, kinked, or damaged during installation. Check for leaks after connection.
15. Never allow children to operate, play with or crawl inside the appliance.
16. Do not use solvent-based cleaning agents or abrasives on the interior. These cleaners may damage or discolor the interior.
17. Use this appliance only for its intended purpose as described in this Instruction Manual.
18. Keep fingers out of the "pinch point" areas. Clearances between the door and cabinet are small by necessity.
19. Be careful closing door when children are in the area.
20. Save these instructions.

 **WARNING:** This product may expose you to chemicals including lead which is known to the State of California to cause birth defects or other reproductive harm.
For more information, visit: www.P65Warnings.ca.gov

 **WARNING:** Child entrapment and suffocation are not problems of the past. Junked or abandoned appliances are still dangerous, even if they will "just sit for a few days". Before discarding your old refrigerator, take off the doors and leave shelves in place so that children may not easily climb inside.

IMPORTANT: This appliance utilizes an external electrical source; therefore, this appliance, when installed, must be electrically grounded in accordance with local codes. In the absence of local codes, this appliance must be electrically grounded in accordance with one of the following:

- NFPA 70
- Canadian Electrical Code, Part 1

We care about your safety, so please...

Read and follow all warnings and instructions before assembling and using your refrigerator.

Retain this manual for future reference.

Service Information

Model Number:

11520

Serial Number: _____

Date of Purchase: _____

Place of Purchase: _____

Installation Instructions

Locating your appliance:

- This appliance is designed and intended for built-in recessed or free-standing installation applications only.
- Place your appliance on a floor that is strong enough to support it when fully loaded.
- Ensure that your appliance is level, there are two adjustable legs on the front of the appliance to assist in leveling the appliance.
- It is recommended that you do not install this appliance near an oven, radiator, or other heating source. Doing so will result in increased energy consumption.
- Do not install in a location that falls below 50°F (10°C).
- For best performance, do not install the appliance behind a cabinet door or block the base of the grill.
- Avoid locating the appliance in moist areas.

Before first use:

1. Remove the exterior and interior packing.
2. Allow the appliance to stand upright for a minimum of 24 hours. This will reduce the possibility of a malfunction in the cooling system from shipping/handling.
3. Clean the interior surface with lukewarm water using a soft cloth.
4. Insert shelf at the desired locations.

IMPORTANT: Ensure the door is fully open when installing the shelves, and take great care not to damage the door gasket with the shelves.

Door Hinge Reversal

Door Hinge Configurations:

- The appliance door can be configured to open on either the left or right side. By default, the appliance is shipped with the hinge on the right.

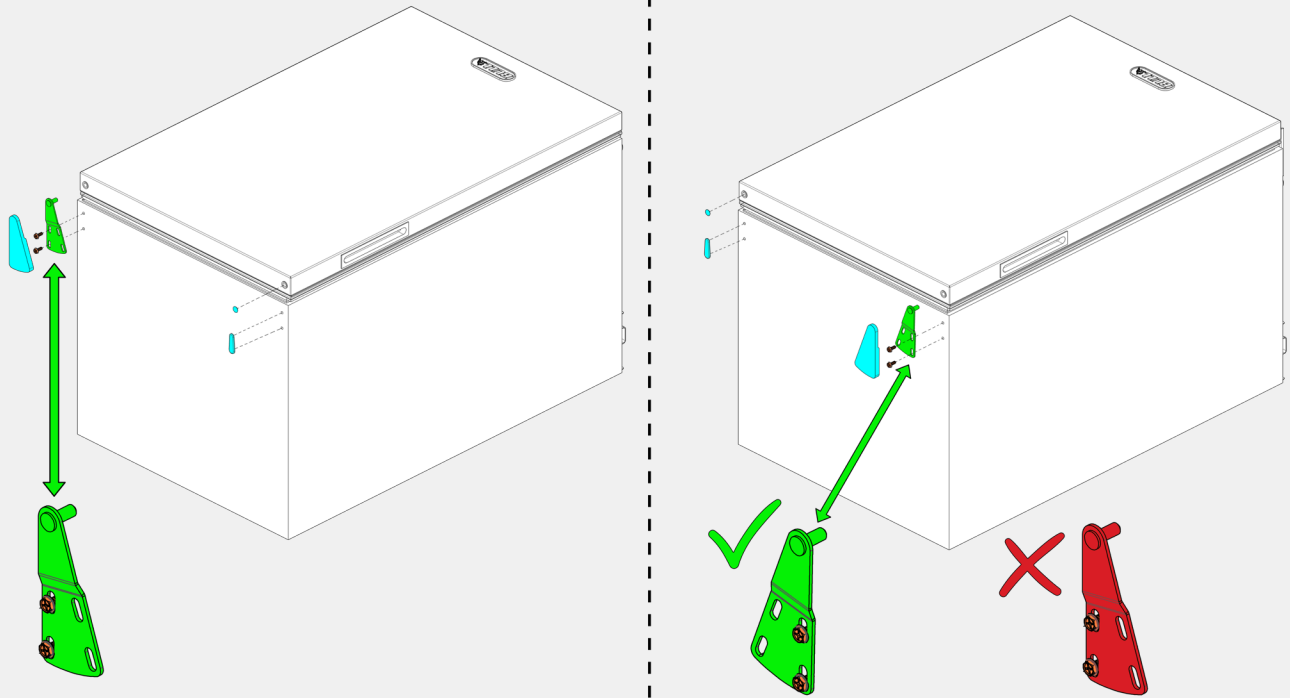

Door Hinge Conversion:

Before continuing, unplug the unit from its electrical source! Then, to swap the hinge arrangement, follow the following process.

1. Carefully turn the appliance on its back as shown on the next page.
2. Gently pry off the decorative caps located on the top of the refrigerator and door.

3. Remove the top hinge bracket by loosening the two screws securing it to the top.
4. Install the top hinge bracket on the opposite side as shown below. Ensure the screws are installed into the correct slots!
5. Install the decorative caps, one covers the top hinge, the other two cover the holes that are now exposed on the opposite side.

6. Remove the bottom hinge bracket secured to the appliance with three screws.
7. With the bottom hinge bracket removed, alternate the leveling feet as shown below. Move the right leveling foot up to the hole which was previously hidden by the bracket. Move the left leveling foot to the rearmost hole to allow for bracket clearance.
8. Install the bottom hinge bracket on the opposite side as shown below. Ensure the screws are installed into the correct slots!
9. Carefully set the appliance back upright.
10. Replace the shelves and wait an hour before plugging the unit back in to the electrical source.

Operating Instructions

1. Your unit has only one control for regulating the temperature in the compartment. The temperature control is located on the upper right-hand side of the compartment.
2. The first time you turn the unit on, set the temperature control to "6".
3. The range of the temperature control is from position "OFF" to "6". After 24 to 48 hours, adjust the temperature control to the setting that best suits your needs. The setting of "3" should be appropriate for home or office use.
4. To turn the appliance off, turn the temperature control to "OFF".

NOTE: Turning the temperature control to the "OFF" position stops the cooling cycle but does not shut off the power to the unit. If the unit is unplugged, has lost power, or is turned off, you must wait 3 to 5 minutes before restarting the unit. If you attempt to restart before this time delay, the unit will not start.

Defrosting:

1. There is no need to defrost the refrigerator; ice depositing on the inner back wall is defrosted automatically.
2. Ice build-up on the inner back wall during the compressor operation will (when the compressor has cycled off) defrost automatically. Defrosted water collects inside the drain by passing through the drain outlet in the inner back wall into a drain pan situated above the compressor. From there, the water should evaporate over time.

Storing Foods:

1. Foods to be stored in the refrigerator should be properly packed to prevent mixing various moisture degrees and odors.
2. Make sure that foods do not touch each other. Assure adequate air circulation around packages.
3. Never store flammable, volatile, or explosive substances.
4. Beverages with a high alcohol percentage shall be stored in tightly sealed bottles in a vertical position.
5. Food should not touch the rear wall of the refrigerator.
6. Try not to open the door too often.
7. Make sure to remove perishable articles of food out of the appliance before you leave for a long time.

Cleaning and Maintenance

1. Turn off the appliance. Unplug the power cord and remove all items including the shelves.
2. Wash the inside surfaces with a solution of warm water and baking soda (about 2 tablespoons of baking soda per 1 gallon of water).
3. Wash the shelves with a mild detergent solution.
4. Wring out excess water from sponge or cleaning cloth before cleaning around control panel display, or electrical parts.
5. Wash the outside of the unit with a solution of warm water and mild detergent. Rinse well and dry with a clean, soft cloth towel.
6. When cleaning the outside of the unit be sure to use cleansers that are designated for stainless steel. Do not use steel wool scrubbing pads or a wire brush.

Power Failure:

Your refrigerator will maintain its temperature for a few hours if the door is kept closed in the event of a power failure. If the power failure continues, you will need to remove the contents that are at risk.

Vacation Periods (or prolonged periods of non-use):

Short Vacations (Less than 3 weeks): leave the unit on.

Long Vacations (Longer than 3 weeks): Remove the contents, unplug the unit and follow the cleaning instructions for interior and exterior.

Note: Odors or Mold growth can be avoided by blocking the door from fully closing, but with care not to harm the door gasket.

Moving the Appliance:

1. Remove all items.
2. Remove the shelves or use tape to secure them in place.
3. Turn the adjustable feet clockwise until they are all the way in to avoid damaging them.
4. Tape the door shut.
5. Use moving blankets or equivalent to protect the outside while moving.
6. Always keep the unit in the upright position, never place on its side or upside down.

Energy Saving Tips:

- The appliance should be located in the coolest area of the room or outdoor location, away from heat producing appliance and out of direct sunlight.
- Ensure the unit is adequately ventilated. Never cover air vents.
- Do not keep the door open any longer than necessary.
- Let hot foods cool to room temperature before placing in the unit. Overloading the unit forces the compressor to run longer.
- Be sure to wrap foods properly, and wipe containers dry before placing them in unit. This cuts down on frost build up inside the unit.
- Unit shelves and storage bins should not be lined with aluminum foil, wax paper or paper towels. These liners interfere with air circulation resulting in less operating efficiency.
- Organize and label stored items to reduce door opening or extended searching for items.
- Remove as many items as needed while avoiding opening door repeatedly. Always close door as soon as possible.

Leveling the Appliance:

Your appliance has two adjustable legs on the bottom. Do not operate your appliance without them. These legs serve two important roles:

1. They are used to level your appliance.
2. They provide a gap beneath the appliance which allows for air flow.

Simply rotate the legs as needed to level the appliance. Rotating the legs clockwise will decrease the height of the appliance in the front while rotating counterclockwise will increase the height of the appliance in the front.

Rotate Counterclockwise to increase height

Rotate Clockwise to decrease height

Appliance Disposal:

Before disposing of the appliance, disconnect the unit from the electrical source. With the appliance disconnected from the power source, cut off the main cable and discard it.

To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safety.

This symbol on the product, or in its packaging, indicates that this product may not be treated as household waste. Instead, it should be taken to the appropriate waste collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by the inappropriate waste handling of this product. For more detailed information about the recycling of this product, please contact your local council, your household waste disposal service, or the shop where you purchased the product.

Troubleshooting

Problem	Possible Cause	Remedy
Appliance does not operate	<ol style="list-style-type: none"> 1. The appliance is turned off. 2. The appliance is not connected to a power supply. 3. Tripped circuit breaker or blown fuse. 	<ol style="list-style-type: none"> 1. Turn on the appliance. 2. Connect the appliance. 3. Reset breaker or replace fuse.
Appliance is not cold enough	<ol style="list-style-type: none"> 1. The temperature not set correctly. 2. The ambient temperature could require a lower setting. 3. The door was opened too often. 4. The door was not completely closed. 5. Door is not hermetically sealed. 6. The condenser is too dirty. 7. The ventilation opening is blocked or dusty. 	<ol style="list-style-type: none"> 1. Check the set temperature. 2. Change the setting to a lower temperature. 3. Reduce door openings. 4. Close the door properly. 5. Check the door seal and clean or replace. 6. Clean the condenser as necessary. 7. Clear the obstructions and dust.
Appliance turns itself on or off frequently	<ol style="list-style-type: none"> 1. The ambient temperature is higher than average. 2. A large amount of food has been added to the unit. 3. The door is open too often. 4. The door is not closed completely. 5. The door gasket does not seal properly. 	<ol style="list-style-type: none"> 1. Locate the appliance in a colder location. 2. Leave the appliance closed until the set temperature has been reached. 3. Do not open the door more than necessary. 4. Close the door properly. 5. Check the door seal and clean or replace.
The interior light does not work	<ol style="list-style-type: none"> 1. The appliance is not connected to a power supply. 2. Tripped circuit breaker or blown fuse. 	<ol style="list-style-type: none"> 1. Connect the appliance. 2. Reset the circuit breaker or replace fuse.
Excessive Vibration	<ol style="list-style-type: none"> 1. The appliance is not properly leveled. 	<ol style="list-style-type: none"> 1. Level the appliance with the adjustable feet.
The appliance seems to make too much noise*	<ol style="list-style-type: none"> 1. The appliance is not properly leveled. 	<ol style="list-style-type: none"> 1. Level the appliance with the adjustable feet.
The door will not close	<ol style="list-style-type: none"> 1. The appliance is not properly leveled. 2. The door was reversed and not properly installed. 3. The door gasket is dirty. 4. The shelves are out of position. 	<ol style="list-style-type: none"> 1. Level the appliance with the adjustable feet. 2. Check the door hinge and reassemble correctly. 3. Clean the door gasket. 4. Check the shelves and install correctly.

* A rattling noise may come from the flow of refrigerant. This is normal and no cause for alarm. As the cycle ends, you may hear gurgling sounds caused by the flow of refrigerant in the appliance. If temperature fluctuations occur, the contraction and expansion of the inner walls which may cause popping and cracking noises.

Product Warranty and Registration

Thank you for choosing Bull Outdoor Products. To enable our commitment to your satisfaction, you will need to register your purchase for it to be covered under Bull's warranty policy. Please save your purchase receipt as it is required for warranty claims. Additionally, registering your purchase will allow Bull or your Bull Authorized Dealer to utilize the encoded information for the purpose of ordering replacement parts or additional accessories to ensure your purchase remains in optimal working condition. To validate your warranty, we offer two options as shown below:

Option 1: Online Registration

 Registration can be completed on the Bull Customer Service Portal

 Scan the QR code, or visit: <https://api.bullbbq.com/c/>

Option 2: Mail-in Registration

Complete the Product Warranty Registration Card located in the shipping box. A reference of the card is shown to the right.

Mail the completed card to:
