

Bull Grills Now NSF Certified

A Major Sales Advantage for Dealers & Distributors!

Bull Outdoor Products has expanded the capability of our grill lineup with NSF certification, giving dealers and distributors a powerful new advantage when specifying outdoor kitchens for projects that require commercially certified cooking equipment. Many municipalities and building codes require certified equipment when grills are installed in shared environments such as:

- Apartment communities
- Condominium developments
- HOA amenities
- Resorts and hospitality properties
- Wineries and event venues
- Public gathering spaces

Why NSF Certification Helps Dealers Win More Projects?

Access Projects Other Grill Brands Can't

NSF certification allows Bull grills to be specified in regulated environments and multi-family developments where certification is required.

Win More Developer & Multi-Family Installations

Apartment communities, condominium projects, and HOA amenities often require commercially certified equipment for compliance and liability.

Reduce Permitting & Inspection Issues

Using NSF-certified equipment helps eliminate common approval, permitting, and inspection roadblocks.

Position Bull as a Professional-Grade Solution

NSF certification reinforces Bull's reputation for durability, safety, and long-term performance.

Unlock Larger Outdoor Kitchen Sales

Community installations often include multiple grills, islands, and outdoor kitchen components, creating higher-value project opportunities.

Stand Out Against Residential-Only Brands

Many grill brands are limited to residential applications. Bull's NSF certification creates a clear competitive advantage.

Built to Win More Projects!

Combined with Bull's premium stainless-steel construction, trusted performance, and industry-leading outdoor kitchen programs, our NSF-certified grills give dealers the confidence to pursue larger, more complex outdoor kitchen installations.

For dealers and distributors, it's another example of how Bull continues to invest in products that create real selling advantages in the marketplace.
